

## 1. Overview

This roadmap outlines the key diplomatic events, negotiation milestones, and stakeholder engagement strategies for securing global adoption of the **International Treaty on AI Governance, Security, and Ethical Co-Evolution**. It ensures a phased, strategic approach to AI governance diplomacy.

---

## 2. Phase 1: Initial AI Treaty Promotion & Global Awareness (Months 0-12)

**Objective: Build momentum, establish high-level interest, and align treaty provisions with key stakeholders.**

### Key Actions:

**AI Governance Launch at the UN General Assembly** → Introduce the treaty framework and secure early endorsements.

**AI Treaty Roundtables at World Economic Forum (WEF) Annual Meeting** → Position AI governance as a priority for global businesses and policymakers.

**Engagement with ITU AI for Good Summit** → Align treaty provisions with international AI standards and telecom governance.

**Preliminary Bilateral Talks with AI-Leading Nations (U.S., EU, China, India, UK, Japan, Canada, South Korea, Brazil)** → Secure initial commitments for formal negotiations.

**Public AI Governance Declaration (First 20 Signatories)** → Establish a coalition of early adopters.

**Output:** Foundational support from leading economies, international organizations, and AI governance institutions.

**Real-Time Progress Tracking:**

- **Milestone Dashboard:** Visualizing treaty promotion efforts and stakeholder engagement.
- **Engagement Status Reports:** Updating outreach success with policymakers and institutions.
- **Event-Specific Success Metrics:** Monitoring effectiveness of AI treaty discussions at key summits.
- **Automated Monthly Reporting:** Generating summaries on progress and pending actions.

---

### 3. Phase 2: Formal AI Treaty Negotiations & Legal Drafting (Months 12-24)

**Objective:** Transition from endorsements to structured treaty negotiations and policy alignment.

**Key Actions:**

**Multilateral AI Treaty Summit at the G20 Leaders' Meeting** → Establish a negotiation framework for treaty ratification.

**Regional AI Governance Agreements (EU, ASEAN, African Union, MERCOSUR)** → Integrate treaty principles into existing regional AI policies.

**Formal Industry Engagement with Big Tech & AI Research Labs (Google DeepMind, OpenAI, Microsoft, IBM, Meta, Amazon, AI startups)** → Align treaty provisions with corporate AI governance frameworks.

**AI Policy Briefings at Global Economic Summits (IMF, WTO, OECD, WEF)** → Strengthen economic arguments for AI governance harmonization.

**Second Public AI Governance Declaration (50+ Signatories)** → Solidify momentum toward full treaty adoption.

**Output:** Official treaty negotiation framework, increasing government and industry participation.

**Real-Time Progress Tracking:** - **Negotiation Phase Monitoring:** Tracking active treaty discussions and policy integrations. - **Signatory Commitment Status:** Logging nations and institutions formally supporting the treaty. - **Stakeholder Response Metrics:** Evaluating industry and regulatory feedback on treaty provisions. - **Quarterly AI Treaty Status Updates:** Ensuring consistent evaluation of negotiation progress.

---

### 4. Phase 3: Treaty Ratification & Global Implementation (Months 24-36)

**Objective:** Secure full legal ratification, establish enforcement mechanisms, and launch governance bodies.

**Key Actions:**

**Global AI Treaty Signing at the UN General Assembly Special Session** → Formalize commitments from 75+ nations and institutions.

**Establishment of the Global AI Governance Council (GAIGC)** → Deploy oversight and enforcement structures.

**Launch of AI Risk Monitoring & Compliance Systems** → Implement real-time AI governance dashboards.

**Implementation of AI Governance Capacity-Building Programs** → Provide AI policy training for regulators, policymakers, and industry leaders.

**First Biannual AI Treaty Review & Amendment Session** → Ensure treaty evolution aligns with AI advancements.

**Output:** Full treaty ratification, operational governance mechanisms, and sustained AI oversight.

**Real-Time Progress Tracking:** - **Treaty Ratification Status:** Tracking formal adoption by signatory nations. - **AI Governance Implementation Scorecard:** Assessing the effectiveness of compliance systems. - **Global AI Oversight Reports:** Monitoring AI policy adherence and enforcement outcomes. - **Automated Compliance Audits:** Generating reports on governance effectiveness.

---

## 5. Long-Term AI Governance Stability & Continuous Improvement

**Annual AI Governance Summits** → Track treaty effectiveness and introduce necessary amendments.

**AI Treaty Peer Review Mechanism** → Conduct periodic assessments of national compliance and risk mitigation efforts.

**Global AI Ethics & Security Audits** → Maintain transparency in AI system deployments worldwide.

**AI Governance Public Engagement Initiatives** → Ensure societal involvement in AI regulatory evolution.

**Real-Time Progress Tracking:** - **AI Policy Compliance Trends:** Evaluating adherence to treaty regulations over time. - **Adaptive Governance Updates:** Adjusting treaty frameworks to evolving AI risks. - **Transparency & Public Reporting Dashboards:** Providing open-access monitoring of AI governance effectiveness. - **Annual Global AI Treaty Reports:** Summarizing global adoption success and policy evolution.

**With this outreach roadmap, real-time tracking, and automated reporting, AI governance diplomacy will be strategically managed, ensuring successful treaty adoption and long-term sustainability.**
