

Targeted Regional Policy Briefs for AI Governance Treaty Negotiations

1. Overview

To ensure effective adoption of the **International Treaty on AI Governance, Security, and Ethical Co-Evolution**, region-specific policy briefs have been developed. These tailored documents address the unique priorities, challenges, and policy landscapes of key global regions. This targeted approach enhances diplomatic engagement and aligns treaty provisions with regional regulatory frameworks.

2. European Union (EU) Policy Brief

Objective: Aligning the AI treaty with the EU AI Act and GDPR regulations.

Key Concerns & Considerations:

Ensuring AI governance complements existing EU legislation (e.g., GDPR, Digital Markets Act).

Protecting fundamental rights, data privacy, and AI safety standards.

Encouraging AI innovation while maintaining strict regulatory oversight.

Preventing AI monopolization and ensuring **open competition** in digital markets.

Proposed Strategy:

Position treaty as a reinforcement of the EU AI Act, ensuring regulatory consistency.

Advocate for cross-border AI security protocols to counter cyber risks and misinformation.

Support **EU leadership in global AI governance**, leveraging existing institutions like the European Commission and European Parliament.

3. United States (U.S.) Policy Brief

Objective: Addressing concerns over AI innovation, economic competition, and national security.

Key Concerns & Considerations:

Ensuring AI governance does not stifle innovation or free-market competition.

Balancing national security interests with AI transparency.

Preventing adversarial AI threats (e.g., deepfakes, cyberattacks, and misinformation).

Defining the role of Big Tech in AI self-regulation.

Proposed Strategy:

Emphasize national security benefits of international AI cooperation.

Align treaty provisions with **U.S. AI safety frameworks (e.g., NIST AI Risk Management Framework)**.

Advocate for **U.S. leadership in AI global governance** while protecting technological interests.

4. China Policy Brief

Objective: Ensuring AI governance aligns with China's AI strategy while preserving leadership in AI development.

Key Concerns & Considerations:

Preserving AI sovereignty while engaging in global governance efforts.

Aligning treaty provisions with China's AI Ethical Guidelines and regulatory policies.

Preventing foreign influence over China's AI industries.

Ensuring AI governance supports economic growth and state-led innovation.

Proposed Strategy:

Emphasize AI governance as a tool for global stability and technological cooperation.

Align treaty discussions with China's goals in AI standardization and global AI trade regulations.

Advocate for mutual AI safety frameworks between China, the EU, and the U.S. to reduce geopolitical tensions.

5. Africa & Developing Nations Policy Brief

Objective: Advocating AI resource-sharing, technology access, and digital capacity building.

Key Concerns & Considerations:

Addressing **the AI divide**—ensuring fair access to AI technology.

Preventing AI-driven economic inequalities and data colonialism.

Encouraging international investment in AI infrastructure.

Ensuring AI systems serve developmental goals (e.g., healthcare, education, agriculture).

Proposed Strategy:

Promote **AI capacity-building initiatives** through global investment funds.

Advocate for AI knowledge-sharing agreements with developed nations.

Push for fair AI trade agreements to ensure technology transfer benefits all economies.

6. Latin America & ASEAN Policy Brief

Objective: Emphasizing AI's role in economic development, regional innovation, and regulatory harmonization.

Key Concerns & Considerations:

Establishing **regional AI regulatory frameworks** compatible with global AI governance. Ensuring AI benefits **local industries and digital economies**. Preventing foreign AI firms from **dominating regional AI markets**. Strengthening **data privacy laws and cybersecurity frameworks**.

Proposed Strategy:

Align treaty discussions with **regional AI strategies (e.g., ASEAN Digital Masterplan, MERCOSUR AI policies).** Promote **joint AI research initiatives between Latin America and ASEAN nations**. Encourage **investment in AI-driven economic development projects**.

7. Next Steps: Institutional Engagement & Private Sector Integration

Following regional policy adoption, targeted **institutional briefs** will be developed.

The next phase will engage **multilateral organizations (UN, G20, ITU) and Big Tech companies** to solidify AI treaty commitments.

AI industry leaders and research institutions will be integrated into governance frameworks to ensure compliance and responsible innovation.

With these regional policy briefs, AI governance negotiations will be adapted to local needs, ensuring stronger global participation and treaty adoption.
